

## System Administrators,

- Do not apply the same fix twice. Always check the program to be sure that you need the change.
- Check the Creation-Date on your latest diskette. Based on that date, only apply the fixes that have been prepared since then.
- The Delta Symbol represents spaces when they are critical:  $\Delta\Delta\Delta$ .
- Zeroes have a dot in the center as follows: 000000.

TECH NOTE # 1266, 12/13/07 **MED-priority**.

DESCRIPTION: Posting amount applied to next account not factoring in costs properly.

TECH NOTE # 1267, 12/23/07 **LOW-priority.**

DESCRIPTION: Cardless Collector Menu appears to hang but is delayed. If you do not have this problem do not do this fix.

This delay is due to counting the entries in the follow-up slider boxes. Typically caused by a combination of a slow system that has a lot of accounts in one status and they are also in follow-up. The next release of the software will time out and show a plus sign next to the number so as not to be delayed.
