

## System Administrators,

- Do not apply the same fix twice. Always check the program to be sure that you need the change.
- Check the Creation-Date on your latest diskette. Based on that date, only apply the fixes that have been prepared since then.
- The Delta Symbol represents spaces when they are critical: **DDD**.
- Zeroes have a dot in the center as follows: **000000**.

TECH NOTE # 1310, 12/02/09 LOW-priority.  
DESCRIPTION: Correct the Release Version on the Main Menu.
